Amend by addition in first paragraph as follows:

The National Education Association believes that the school environment/work site must be free from all forms of bullying including, but not limited to, physical and psychological bullying, and cyberbullying. Bullying is the systematic and chronic infliction of physical hurt and/or psychological distress on one or more individuals. The Association recognizes that bullying can affect the entire school community and work sites.

The Association also believes that its affiliates, collaborating with local school districts and institutions of higher education, should involve all stakeholders in developing comprehensive schoolwide programs to address all forms of bullying. Such programs should—

- a. Establish strong policies prohibiting bullying that include the definition, consequences, and procedures for reporting and appeals
- b. Develop and implement educational programs designed to help

students recognize, understand, prevent, oppose, and eliminate bullying

c. Provide training for all school employees in bullying prevention and intervention

d. Provide professional development materials and resources.

These programs should be reviewed, revised, and updated to reflect changing needs. (2004, 2010)
